### **DETAILED ACTION**

In the previous restriction it was overlooked that amendment A added method claim 46 which was distinct from the original claims. The omission of this further restriction from the previously presented election of species is regretted. Applicant's previous election of species I is still in force, however, should applicant wish to shift that species election when making this election, applicant may do so.

#### ***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-6, 14-19, 27-44 and 46, drawn to display device, classified in class 349, subclass 73.
- II. Claims 45, drawn to method of making a display, classified in class 349, subclass 187.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the products can be made using a different process, for example polishing using a liquid having fine particles.

Because these inventions are distinct for the reasons given above and the search required for Group II in class 438 subclass 30 is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
